ABSTRACT OF THE DISCLOSURE

Disclosed herein is a *Senecio* plant named 'Sunsenerabu';  
being of a high height and dome-shaped plant with abundant  
5 branching. Petiole length is longer than in *Senecio L.* It  
has large inflorescence cluster. Inflorescences are single  
flowered and have small obscure marginal variegation. The  
color of the ray floret is light violet and the disc floret is  
strong violet. Blooming term is longer than *Senecio cruentus*.  
10 Flower buds grow one after another from axil.
